

Wire-rope clips for cable lifts and chair lifts for wire-rope diameters from 13-32 mm. Our wire-rope clips with spring-operating storage and pendular-break meet the highest demands concerning quality in the ski-lift industry. The clips are manufactured from highly forged heat-treated steel and therefore show the highest qualities concerning lifetime and wear. Because of design and state-of-the-art engineering this component features the highest ride comfort and operational safety.

The benefits include:

- Easy assembly due to helical disk spring (no decomposition in individual disks)
- Fast and easy relocation of clips by ex-centric key
- High operational safety and minimal wear due to patented pendular-break
