

Since 1962, Fluiten has manufactured precision rotary unions for a wide range of applications, including for coolant, water, oil, steam, and other diverse media. An ISO 9001 certified company, Fluiten is a leader in providing innovative and effective rotary solutions for industry.

Depending on the type of union, operating speeds ranging from 3,000 to 30,000 rpm with pressures up to 3,000 psi are possible. A number of models also have the capability to run dry if required. Custom-designed unions are also available.

In addition to a standard product line, Fluiten also offers rotary unions that are interchangeable with common rotary union products used in the machine tool industry. High quality and long service life make Fluiten rotary unions an excellent replacement part choice.

Transatlantic Connection, Inc. provides application-engineering services for Fluiten products and stocks common replacement unions in Rockford, IL. Contact us for more information.
